UPPER BANK NURSERIES

MEDİA, PA.
HOW often, in rambling through old gardens, either in our own immediate neighborhood or those visited at more distant points, we experience a lack of sustained interest, we see a repetition of the commonplace, we might even say the never ending monotony of observing, over and over again, the usual Foxgloves, Sweet Williams, Moss Pinks, Sunflowers, obsolete Phloxes, etc., etc.,—in fact we can almost visualize, in advance, their stereotyped ensemble before we inspect them.

We do not deny that these old fashioned flowers have a certain charm and even fill a necessity with their quaintness of type and color. However, we have endeavored to break away from this prosaic sameness by collecting, propagating and cultivating the newer, better and rarer gems among all the well known hardy plants, to supplement these old favorites, and our efforts in this respect have resulted in the assembly of a host of floral beauties not usually found in a day's travel.

It is such flowers that will make your garden distinctive, colorful and unusual; a garden that will make visitors halt in their steps, and even go into ecstasies of delight and rapture over some new or uncommon color of a familiar flower, or gasp in amazement at some odd beauty entirely new to them.

Our search for the unusual has led us to the very corners of the earth to enable us to gather here in our premises these uncommon and uncommonly beautiful flowers and plants, so that readers of this catalogue or visitors to our nurseries can choose, with our recommendations, these newer and better plants for their gardens. Our collection of Hardy Plants and Shrubs comprises most of the finest types known to the Horticultural world and includes many rare gems that are not procurable elsewhere.

All have proven quite hardy with us and will thrive with ordinary care, in soils and positions known to be agreeable to the type in general. Our plants are liberal sized field divisions that not only become quickly established but will also give a fair floral display the first year.

ROCK PLANTS: The popularity of rock gardening has prompted us to offer a delightfully choice assortment of these varieties which are designated by an asterisk (*), preceding all plants suitable for use in rock or wall gardens.

PRICES: A casual glance at our prices may momentarily convey the impression that we are expensive, but upon closer examination, you will note that our prices for three or ten of a kind are generally on a par with the prices of other reputable growers. The unit price has been slightly increased and our reasons for the advance in the price of single plants are:

1. It takes time and labor to label, assemble and pack orders for single plants, a process that eats up our moderate profits.
2. One plant of a kind will seldom make an impressive showing in the garden.
3. Three plants of one kind will give quicker massed results and will offset the bareness of an odd failure here and there.

We urge our customers to use fewer varieties and to order three of a kind at least. This will not only be more economical but will also prove infinitely more satisfactory.

UNLISTED VARIETIES: In addition to the great variety of plants listed in our catalogue, we are constantly adding to our stock many new plants. The quantities of such available does not warrant listing, but we welcome inquiries and feel confident that these unlisted beauties will prove most desirable, and will appeal to those particular clients who wish to have something "just a little different".

VISITORS. The Nurseries are conveniently located at Media, Pa., 15 miles from Philadelphia. Visitors are always welcome.
ACHILLEA. Well drained soil in sun.

Aegyptica. A choice variety with pale yellow flowers and ferny foliage. 1½ ft. July................................................................. $ .40 $1.00 $3.00

IRIS—Continued

MRS. HETTY MATSON. One of the best bicolor purples; tall, free flowering and well shaped. Color rich and striking. Ea. 3 10

MRS. NEUBRONNER. Very deep golden yellow. An excellent color. .25 .60 1.50

NINE WELLS. S. light violet; F. deep purple violet with white at the throat. Very tall and branching. .50 1.25 4.00

NUEE D’ORAGE. S. slaty gray; F. bronze purple. Fine for massing. .25 .60 1.50

PALLIDA DALMATICA. S. clear lavender-blue; F. clear deep lavender. A superb variety. One of the old favorites but still unsurpassed. .25 .60 1.50

PARISIANA. S. white dotted and shaded purple; F. white with frilled lilac edges. .35 .75 2.50

PASTEL. Pale lavender flushed and suffused yellow. A real pastel combination. .50 1.25 4.00

PFAUENAGE. “Peacock’s-Eye.” S. olive-yellow; F. brownish blue, with a golden yellow border. .15 .40 1.00

POWHATAN. S. light violet with deeper borders; F. deep purple with crimson shades. .35 .75 2.50

PRIMAVERA. Considered by Iris lovers as one of the finest new yellow Irises. The flowers are large, while the growth might be termed intermediate. An Iris which will win favor everywhere. Limited stock. 2.00

PROSPER LAUGIER. S. light bronze-red; F. velvety ruby-purple with orange beard. A very handsome Iris. .25 .60 1.50

PUMILA. See under Iris Pumila, page 21.

QUAKER LADY. S. smoky lavender with yellow shadings; F. ageratum blue and old gold. A striking and unusual Iris. .25 .60 1.50

QUEEN OF MAY. A rosy lavender-pink self. An excellent Iris for mass plantings. .25 .60 1.50

RED CLOUD. S. an unusual shade of rosy lavender bronze; F. velvety maroon crimson, veined yellow. .50 1.25 4.00

ROMEO. Citron yellow dotted purplish brown; throat streaked maroon and white. .50 1.25 4.00

ROSE UNIQUE. A rosy lavender self. The earliest pink variety. .35 .85 2.50

RHEIN NIXE. S. pure white; F. violet blue with white edge. Tall and very striking when massed for effect. .25 .60 1.50

SAMBUCINA. S. lilac, suffused yellow; F. reddish purple. An old favorite. .15 .40 1.00

SARABAND. S. cream buff, flushed lilac pink; F. velvety violet edged with peach. .50 1.25 4.00

SHEKINAH. Pale lemon yellow deepening at the center. Tall and very fine. .35 .85 2.50

SHERWIN WRIGHT. Golden yellow. Deeper color than Shekinah but not so tall. A vigorous grower. .75 2.00 6.00

SHREWSBURY. S. rosy bronze, F. violet purple with marked yellow beard. Late and of very striking coloring. .25 .60 1.50
IRIS—Continued

SOUVENIR DE MADAME GAUDICHAU. Rich, deep, red-purple. Large flowers and magnificent coloring. Stands out well against pale blues.................. 1.00 2.50 7.50

STEEPWAY. S. fawn pink; F. rosy mauve to opalescent blue. Of the type of Quaker Lady, but more brilliant and outstanding.... .75 2.00 6.00

SYMPHAX. S. pale violet; F. deep crimson purple. Large flowers of exceedingly good form and fine coloring................................. .50 1.25 4.00

TAFFETA. S. soft fawn; F. fawn shading to blue. A very delicate and subtle coloring............................................................... .35 .85 2.50

TALL MAGENTA. A tall and striking magenta-red Iris..................... .35 .85 2.50

THE FREAK. S. clear lavender oddly splashed raisin purple; F. deep raisin purple with occasional splashes of lavender. Unique and lovely. ............................................................. .50 1.25 4.00

THORBECK. S. white; F. a rich clear violet blue reticulated white at the base................................................................. .25 .60 1.50

VALENCIA. An indescribable orange buff self. A gorgeous and unusual shade in Irises. A superb flower. Stock limited........... 4.00

VIRGINIA MOORE. A very tall, clear yellow. A fine Iris, but not a very sturdy one.............................................................. 1.00 2.50 7.50

VICTORINE. S. white splashed with dark blue markings; F. deep pansy purple. Very interesting coloring................................. .25 .60 1.50

VIOLACEA GRANDIFLORA. S. rich blue; F. deep violet blue. Tall. ....................................................................................... .25 .60 1.50

WALHALLA. Blue Purple, and of medium height.............................. .25 .60 1.50

WHIM. S. cream splashed with rose; F. cream. An unusual and charming Iris, ................................................................. .50 1.25 4.00

WHITE KNIGHT. Pure white. The whitest of all the Irises. Very beautiful. ................................................................. .50 1.25 4.00

WYOMISSING. S. cream white suffused with rose; F. deep rose shading to a paler border. Best by itself, where it is very lovely .25 .60 1.50

ZOUAVE. White slightly tinged lilac. Crimped and crinkled like crepe paper. Not tall, but exceedingly delicate and lovely....... .50 1.25 4.00

IRIS—BEARDLESS VARIETIES

Unlike the foregoing, these types seem to prefer a rich, moist soil.

DELAVAYI. Standards deep violet. Falls, with a white patch at the bend, and white markings. July............................................ $1.00 $2.50 $7.50

ENSATA. Gray-blue flowers low down in the tussocks of long leaves that serve well as garden twine........................................ 1.00 2.50 7.50

FULVA. A rich terra-cotta. A unique shade in Irises. Native of Louisiana, but hardy in the north........................................ 1.50 3.50 10.00

PSEUDACORUS. Brilliant yellow flowers. At its best in shallow water. Fine for edging pools or ponds. 5-6 ft.............................. .35 .85 2.50
IRIS—Continued

SUPRIA. S. violet deepening to purple; F. blue with yellow blotch. A superb plant. ................................................................. .50 1.25 4.00
—A. J. Balfour. Lavender blue, somewhat darker than A. W. Tait. ................................................................. .75 2.00 6.00
—Alba. A chaste white; a lovely Iris.............................................................................. .50 1.25 4.00
—A. W. Tait. Soft porcelain blue flowers. Showy and free blooming. ................................................................. .75 2.00 6.00
—Lord Woolsey. S. rich purple; F. blotched bronze......................................................... .75 2.00 6.00

VERSICOLOR. A native of the Eastern U. S. Pale blue purple, veined darker. Good for planting at water side. ......................... .35 .75 2.50

WILSONI. A pale yellow Iris much like a yellow Iris siberica............. 1.50 4.00 10.00

IRIS PUMILA

Dwarf tufty Iris very desirable for use in the rock garden or as borders for the taller growing kinds.

*ALBA. “The Bride.” A very early pure white Iris. Small and chaste. ................................................................. $ .25 $ .60 $1.50
*CYANEA. An early blooming dwarf with clear, rich purple flowers. ................................................................. .25 .60 1.50
*LUTEA. An early bloomer of very tufty growth with flowers of soft Nankeen yellow. Choice. ................................................................. .25 .60 1.50
*ORANGE QUEEN. Deeper in shade than the preceding but equally fine. ................................................................. .35 .85 2.50
*SCHNEEKUPPE. Little white pumila. The best white, but not the earliest. ................................................................. .35 .85 2.50

IRIS SIBIRICA

This section of the Iris family are highly valued for their later blooming qualities for they bloom during June and July. Slender foliage and free blooming qualities make them very desirable for mass plantings.

BUTTERFLY. An uncommonly beautiful Iris of clear porcelain blue. A delicate and charming color............................................ $1.00 $2.50 $7.50
COREAN. A lovely pale periwinkle blue. Very beautiful.................. .75 2.00 6.00

SNOW QUEEN. Magnificent tall white with yellow hafts..................... .35 .85 2.50
SUNNYBROOK. A superb large pale grayish blue. A truly gorgeous flower. ................................................................. 1.00 2.50 7.50
TRUE BLUE. A select form of orientalis. A splendid delicate blue. 1.50 4.00 10.00
IRIS SPECIES

*CRIISTA. A dwarf native. Very dwarf, low spreader with clear, pale blue flowers. One of the choicest for the rock garden. ................................................................. $ .50 $1.25 $4.00

*GRACILIPES. Like a pygmy Japanese Iris. Pale lavender flowers of delicate texture. A rare Iris that prefers a sheltered spot in shade in the rock garden. 1.50 4.00 10.00

IRIS KAEMPFERI
(Japanese Iris)

The rear guard of the Iris hosts, giving us salver shaped blossoms with drooping petals, held high above the foliage. In color they range from Ivory white thru pale grays, doves, slate blues, pinks, wine reds to deepest purples. They thrive best in a rich, deep moist soil with an abundance of water prior to and during the blooming period in July. 3-4 feet........................................ $ .75 $2.00 $6.00

LATHYRUS. Ordinary soil in sun.
latifolius. "Everlasting Pea." A vigorous climber suitable for growing on a trellis or tree stump. Bright red flowers. July-September. ................................................................. .35 $ .85 $2.50
—albus. A white variety of the preceding. June-Sept. .35 .85 2.50

LEPACHYS. Ordinary soil in sun.
pinnata. A western variety of the Black eyed Susan. A graceful plant with large primrose flowers, the long twisted petals of which are pendant from a central cone. Very graceful. 4-5 ft. Midsummer. ................................................................. .40 1.00 3.00

LIATRIS. Ordinary soil in sun.
spicata. "Spike Gayfeather," 2 to 3 ft. July to September. Slender spikes densely crowded with rosy purple flowers. .35 .85 2.50

LINUM. Rich, moist soil in sun.
perenne. "Blue Flax." Feathery blue-green foliage and masses of deep sky-blue flowers. One of the finest blue effects in the garden. 2 ft. June-July................................. .30 .75 2.00

LOBELIA. Rich, moist soil in sun.
cardinalis. Spikes 5-6 ft. high glowing with intense cardinal red flowers. Combined with Aster Novae Angliae, it makes a bold and gorgeous late summer effect. September................................. .50 1.20 3.50
—syphilitica. A soft lavender blue variety of the preceding. 2 ft. Very late blooming and lovely for naturalizing. .35 .85 2.50

LUPINUS. Rich soil in sun.
polyphyllus. 2 to 3 ft. June to September. Beautiful plants with handsome leaves and deep blue, pea-shaped flowers in bold, long spikes. ................................................................. .40 1.00 3.00
LYCHNIS. Ordinary soil in sun.
  *alpina. “Arctic Campion.” 4 in. An attractive alpine plant with
tufted foliage and reddish purple flowers................................. .50  1.20  3.50
  *chalcedonica. “Soldiers on the Green.” Umbels of brilliant
orange-scarlet flowers. 2-3 ft. high. June and July. Magnifi-
cent as a strong and flame-like note among paler colors.............. .30  .75  2.00
  — __salmonía. Like the preceding but with flowers of an ex-
quise luminous salmon pink. Stock limited................................. .50
  haageana. A low growing variety of the former. The colors
range from a pale creamy pink to a rich jasper red. The
flowers are very large and the plants have a trailing habit......  .40  1.00  3.00

LYSIMACHIA. Rich, moist soil in sun.
  ciliata. “Fringed Loosestrife.” Dainty yellow flowers with dark
bronzy foliage. 2 ft. July-Aug................................................. .30  .75  2.00
  clethroides. “Japanese Loosestrife.” A fine hardy variety from
Japan, with long spikes of pure white flowers. 2 ft. July-Sept.   .30  .75  2.00
  punctata. Brilliant yellow, star-like flowers in the axils of the
leaves. Forms a fine close border or little hedge, 3 ft. high, the
brilliant gold flowers making a very showy effect.................  .30  .75  2.00

LYTHRUM. Bog or marshy ground; sun.
  Salicaria roseum. “Rose Queen.” A remarkably free-blooming
variety, with long, graceful spikes of rosy pink flowers. For
bog-garden or naturalizing, there is nothing to equal it. 2 to
3 ft. July-Sept............................................................... .35  .85  2.50

MALVA. Rich, moist soil in sun.
  alcea. “Hollyhock Mallow.” Round, much-divided leaves and
numerous bright pink flowers; like small hollyhocks. 1-2 ft.
July-Aug. ................................................................. .40  1.00  3.00
  moschata. “Musk Mallow.” August to September. Fragrant,
rosy-tinted flowers in clusters. A very pretty and deserving
plant which should be massed in borders. 2-3 ft........................ .65  1.50  4.50

MANFREDA. Well drained soil in sun.
  Virginica. “Virginian Agave.” A rare native with tufty green
foliage and nutmeg scented flowers. 3-5 ft. Stock limited....... .50

MATRICARIA. Ordinary soil in sun.
  inodora. “Feverfew.” White button-like flowers borne profusely
throughout the summer. Excellent for cutting......................... .30  .75  2.00

MAZUS. Well drained soil in sun or semi-shade.
  *rugosus. A delightful little prostrate creeper forming close
mats of foliage. During June and July the small snapdragon-
like flowers of clear amethyst cover the plant. 2 inches........... .30  .75  2.00

MELISSA. Ordinary soil in sun.
  officinalis. “Lemon scented Balm.” June to August. An old-
fashioned sweet herb, grown for its fragrant foliage. White
and yellowish flowers in clusters. 1-2 ft. Fine for bouquets in
association with other flowers........................................... .35  .85  2.50

MENTHA. Light moist soil in sun.
  piperita. “Peppermint.” A well-known useful herb with fragrant
foliage. For sauces and seasoning...................................... .25  .65  1.50
MEUM. Ordinary soil in sun.
  anthemanticum. Valued alike for its button-like yellow flowers and ornamental, deep green, closely frilled foliage. Very robust. 3 ft. ................................................................. .30 .75 2.00

MONARDA. Moist soil in sun.
  didyma. “Oswego Beebalm.” 1½ to 2½ ft. June to September. showy heads of brilliant scarlet flowers in rich profusion. Very effective with lavender Funkias. Fragrant foliage and flowers. .30 .75 2.00
  —salmonae. “Salmon Beebalm.” A rather uncommon sort with flowers of soft salmon-pink. It likes a moist situation and is a beautiful massing plant. 1½-2½ ft. July-August................. .40 1.00 3.00
  violacea. “Amaranth Beebalm.” A distinct sort with bright purple-red or amaranth-red flowers. 1½-2½ ft. ................................. .40 1.00 3.00
  fistulosa. “Wild Bergamot.” 2 to 3 ft. July and August. A pretty plant, producing fine lavender flowers. It will grow well in dry places ................................................................. .30 .75 2.00

MYOSOTIS. Moist soil; semi-shade.
  palustris. “Forget-me-nots.” Sprays of small sky blue flowers with yellow centers. It will grow in sun but prefers semi-shade. A charming old fashioned plant that should be planted in every garden. 6 in. May-June................. .30 .75 2.00

NEPETA. Rather moist soil; sun.
  mussini. Aromatic sage green foliage with lavender flowers in June. Invaluable for rock garden or border edging. A very effective and charming plant. 1 ft.................................. .40 1.00 3.00

OENOTHERA. Ordinary soil in sun.
  fruticosa. Masses of lemon yellow flowers in June. 18 in. high. A robust and free blooming plant which is attractive during the winter owing to its ornamental flat bronze foliage...................... .35 .85 2.50
  *Missouriensis. A native species with large trailing soft yellow flowers during June-July. Will thrive in dry situations.............. .50 1.20 3.50

OPUNTIA. Dry sandy soil in sun.
  vulgaris. A hardy cactus with succulent spine studded foliage; yellow flowers which are followed by red fruits. Useful and interesting in rock garden or in dry, parched locations.......................... .30 .75 2.00

PACHYSANDRA. Any soil in shade.
  A most ornamental ground cover for growing in the shade of trees, shrubbery or rhododendron beds. Handsome evergreen foliage. 6-9 in................................................................. .20 .50 1.50

PAPAVER. Rich, light soil in sun.
  *Altaiaca. A delicate apricot-orange poppy that blooms all summer. Increases rapidly and soon establishes itself in the garden. 1 ft. and of very delicate growth................................. .35 .85 2.50
  *Mongolica. A small pure yellow poppy from the Kansu Pass in Mongolia. Very free blooming and rare. Forms a beautiful bit of mid-summer color in the rock garden. June-September. 6 inches. ................................................................. .75 2.00 6.00

RUDBECKIA. Rich soil in sun.

laciniata. "Golden Glow." A brilliant and stately plant. Profusion of yellow flowers, in July and August. 5-6 ft. ...................... .30 .75 2.00

maxima. Bright yellow flowers with a tall cone in the center and rosettes of glaucus green leaves. July. 4 ft. .......................... .40 1.00 3.00

Newmanni. "Black-Eyed Susan." Brilliant orange yellow petals surrounding a smooth black cone. Beautiful in late summer and easy to grow. 2-3 ft. .......................... .35 .85 2.50

—purpurea, (syn. Echinacea purpurea). "Purple Cone Flower." Large flowers with a center cone of deep bronze while the long petals surrounding it are of a charming Jasper pink. 4-5 ft. July-Aug. .................................................. .35 .85 2.50

RUTA. Ordinary soil in sun.

graevoleus. The old fashioned "Rue." An herb with aromatic, finely cut foliage and fine for use in flavoring or for cutting to combine with flowers. .......................... .30 .75 2.00

SALVIA. Rich soil in sun.

azurea. Clear sky-blue flowers on gracefully bending 4-ft. stems, unequalled for a fine, late blue effect in the border. August ... .35 .85 2.50

atroazurea. A little later variety, not so tall and of a real sapphire blue. 3-4 ft. August-September .......................... .40 1.00 3.00

farinacea. Very free flowering, lavender blue. The stems as well as the flowers are blue and can be dried for winter decoration. 3-4 ft. August until frost .................. .30 .75 2.00

officinalis. The herb Sage. Lavender flowers and aromatic leaves used in seasoning. An ornamental garden plant as well. 3-4 ft. .......................... .30 .75 2.00

Turkestanica. Tall stalks of silvery-lavender flowers and large hairy leaves. Fine for the back of the border. 4-5 ft. June ... .40 1.00 3.00

virgata nemorosa. Spikes of vivid purple flowers with reddish bracts that remain beautiful after the flowers are done. In a mass this is one of the most beautiful and showy plants in the garden. 3-4 ft. July-August .......................... .50 1.20 3.50

uliginosa. 3 feet. Spikes of torquoise blue flowers in Sept.-Oct. A charming variety blooming in Sept.-Oct. when flowers are scarce. .......................... .40 1.00 3.00

SANTOLINA. Ordinary soil in sun.

*chamaecyparissus. "Lavender Cotton." 1½ to 2 ft. A dwarf evergreen perennial, with attractive silver-white foliage. It is useful as a rock or border plant. .......................... .35 .85 2.50

SAPONARIA. Well drained soil in sun.

*ocymoides. "Rock Soapwort." 6 in. May to August. A half-trailing plant, useful for rockwork, with bright pink flowers in loose, broad cymes. .......................... .35 .85 2.50

officinalis. "Bouncing Bet." June-July. Pretty variety, with broad heads of pink and white flowers. Fine for wild-garden. Spreads very rapidly .......................... .30 .75 2.00

SATUREIA. Ordinary soil; sun or semi-shade.

*alpina. (syn. Calamintha Alpina.) A pretty plant with wooly, gray foliage and pink flowers. 8-12 in. June-July .......................... .35 .85 2.50
SAXIFRAGA. Rich soil in sun or semi-shade.

*megasea. Large bronze green leaves with compact stalks of soft pink flowers in April. Fine for mass effect in rock garden or borders. ........................................................... $ .50

SCABIOSA. Rich soil in sun.

Caucasica. “Caucasian Scabiosa.” 18 in. June to September. Vigorous, handsome border plant with large, soft lilac-blue flowers on long stems, useful for cutting. ......................... $ .35 $ .85 $ 2.50

Webbiana. A charming perennial scabiosa with sulphur yellow flowers in bloom from July till frost. 1-2 ft. ......................................................... $ .30 $ .75 $ 2.00

SCUTELLARIA. Ordinary soil in sun.

baicalensis coelestina. Flowers resemble the Snapdragon in shape, are clear blue in color, and are produced from early Summer until frost. ................................. $ .40 $ 1.00 $ 3.00

SEDUMS
(STONECROPS)

Satisfactory plants for use in rock gardens or borders. The succulent foliage of all and the brilliant flowers of some, make them excellent subjects for dry sunny soil where but little else will thrive.

*ACRE. Forms a low dense mat of moss like foliage, which in June is covered with star-like yellow flowers. 3 in........................ $ .30 $ .75 $ 2.00

*ALBUM. Succulent leaves of dark green, assuming bronzy tints in the Fall. White flowers in July. 4-6 in................................................................. $ .30 $ .75 $ 2.00

*ANACAMPSEROS. Clusters of glaucous gray, circular leaves at the terminals of branching stems. ............................................................ $ .30 $ .75 $ 2.00

*ARBOREUM. A larger “reflexum” with attractive blue green foliage. Distinct and interesting. ............................................................ $ .30 $ .75 $ 2.00

*COCCINEUM. A variant of the “spurium” section forming dense mats of deep green foliage which turns bronze in Fall. ......................... $ .30 $ .75 $ 2.00

*DIVERGENS. A native of our northwest with reddish stems and bronze foliage which resemble beads strung along the stems. Yellow flowers in July. 6 inches............................... $ .30 $ .75 $ 2.00

*EWERSI. Akin to “anacampseros” with round glaucous leaves along the prostrate stems. Flowers rose color................................. $ .30 $ .75 $ 2.00

FABARIA. An interesting form of “telephium” with narrower leaves than the type and which show white variegations in some soils. 12-18 in................................. $ .30 $ .75 $ 2.00

*IBERICUM. Another variant of the “spurium” section of this vast family. The medium sized leaves turn very red in winter. ......................... $ .30 $ .75 $ 2.00

JAPONICUM MACROPHYLLUM. A tall growing type of the “Rhodiola” section with large spatulate leaves and yellow flowers. ......................... $ .65 $ 1.50 $ 4.50
SEDUMS—Continued

*KAMTCHATCUM. An Asiatic form with rather large basal leaves, diminishing in size towards the terminals of the branches. Yellow flowers. July. 9 in. .40 .10 .30

*LYDIUM. A tufty, compact low spreader with rich green foliage during early summer. Later in the season the foliage assumes the most brilliant coppery shades. 3 in. Charming. .40 .10 .30

MAXIMUM. Foliage large, with fine rose colored blossoms in July. 9-15 in. .35 .85 .25

*PULCHELLUM. A native sedum which many authorities rank amongst the best of the family. Cypress-like green foliage and pink flowers. Best in cool moist soil. .30 .75 .20

PURPURESCENS. A variant of the “telephium” type and splendid for mass plantings. .40 .10 .30

*REFLEXUM. A low, rapidly growing spreader with fine foliage resembling a club moss. Foliage assumes lovely tints in autumn. .30 .75 .20

*—CRISTATUM. While like the foregoing the foliage forms broad “cock’s-comb” crest-like formations. Very interesting. Rare. .50 1.20 3.50

*RUPESTRE MINOR, (syn. Pruniatum Fosterianum). One of the finest of the “reflexum” type with gray purple foliage which assumes lovely rosy purple tints in the fall. Yellow. 6 in. .30 .75 .20

*SIEBOLDI. One of the gems of the race. Round, fleshy leaves, edged carmine. Its deep pink flowers in September strike the last chords of the color symphony of the rock garden. .65 1.50 4.50

*SEXANGULARE. Akin to, but yet, distinct from acre. Forms compact masses of geometrical foliage with bright yellow flowers. July. 4 in. .30 .75 .20

SPECIES MAINE. A species found growing in Maine which resembles a choice variety of rupestre but of larger growth. The foliage is glaucous but assumes lovely fall coloring. .30 .75 .20

SPECTABILE “BRILLIANT.” A splendid border species with corymbs of rich carmine flowers in September. Glaucous green foliage. 18 in. .35 .85 .25

*SPURIUM. One of the variants of “stoloniferum” with fine foliage which assumes lovely autumn colorings. .30 .75 2.00

TELEPHIUM. A border variety of open growth, showy crimson flowers and fine foliage of bronze coloring. .35 .85 .25

UNNAMED SPECIES No. 1. This is an interesting sedum which arrived at our nurseries via the “friendship route” without name. It is a creeping sort with large leaves and white flowers. .30 .75 2.00

—No. 2. Another unnamed sort similar to the above but with fine yellow flowers. .30 .75 2.00
SEMPERVIVUM (Houseleeks). Well drained soil in sun.  
*fimbriatum. An improved "cob-web" houseleek. Small rosettes of succulent leaves from the ends of each run thin cob-web-like threads. Choice and interesting.................. .35 .85 2.50  
globiferum. Compact globes of light green. The young plants emerge from under the parent plant and soon set up an independent growth. ................................................................. .15 .50 1.00  
tectorum. The old fashioned "Hen and Chicks" cactus-like green rosettes tipped with deep red. Fine for rock or wall gardens and for edging formal beds or borders......... .10 .25 .75

SHASTA DAISY. Rich soil in sun.  
(syn. Chrysanthemum maximum). A showy border plant with large, fine white daisies. 3 ft. July-Aug. Fine for cutting..... .30 .75 2.00

SILENE. Ordinary soil in sun.  
asterias. An uncommon "catch-fly" with globular heads of crimson-scarlet flowers on 3-4 ft. stems. July-Aug.................. .35 .85 2.50  
*schafta. A charming subject for the rockery or border of trailing habit with soft purplish rose flowers which appear in July-Aug. 12 in. ........................................ .35 .85 2.50

SISYRINCHIUM. Rich, moist soil in sun.  
*augustifolium. "Blue-eyed Grass." A very pretty grass-like plant with delicately beautiful little blue flowers. For rock garden or border. 12 in. July-Aug................................. .40 1.00 3.00

SPIRAEA. Moist, rich soil; semi-shade.  
astilbe. A fine border plant with plume-like flowers shading from cream to pink. The finely cut foliage is handsome all summer. 2-3 feet. July. ......................................................... .65 1.50 4.50  
filipendula. Loose sprays of fluffy, cream colored flowers poised on slender stems. Ferny foliage. 1-2 ft. June.................. .40 1.00 3.00  
gigantea. A taller growing variety, like the above but the flower heads are flatter. Best in the back of the border. 5-6 ft. June. .40 1.00 3.00

STACHYS. Ordinary soil in sun.  
*lanata. "Woolly Betony." 1 ft. July. A very useful plant for edging because of its dense, attractive, gray, woolly foliage which is particularly effective in showing off the small, water-melon pink flowers........................................... .35 .85 2.50

STATICIE. Ordinary soil in sun.  
latifolia. (syn. Limonium latifolium). An effective border plant with foamy masses of minute lavender flowers which may be dried and used for winter decoration. 1-2 ft. July.................. .35 .85 2.50

STOKESIA. Rich, cool soil in sun.  
cyanea. Flowers of an exquisite, light violet-blue like large China Asters. Low growing and drought resistant. One of the most beautiful late flowers in the garden. 1 ft. August to frost. .35 .85 2.50
TANACETUM. Ordinary soil in sun.
    vulgar. Old-fashioned Tansy. Finely cut aromatic leaves and masses of button-like, yellow flowers. July-Aug. 3-4 ft. Ea. 3 10
    .25 .65 1.50

TARRAGON. Rich soil in sun.
    (syn. artemesia dracunculus). Should be in every herb garden. Leaves delicious either as a seasoning or as a flavoring for vinegar. 2-3 ft. .35 .85 2.50

TEUCRIUM. Ordinary soil in sun.
    Canadense. Small leaves of a rich green with little lavender pink flowers. The bushy little plants stay green all winter. 1 ft. .40 1.00 3.00

THALICTRUM. Moist, leaf mold soil; semi-shade.
    adiantifolium. "Rue.” Foliage like a Maidenhair Fern. 2-3 ft. Lovely for mixing with cut flowers. .40 1.00 3.00
    atropurpureum. Tall pink Rue. One of the most beautiful perennials. Fluffy, light pink balls on tall stems. 3-4 ft. June. .40 1.00 3.00
    flavum. An even taller and larger variety; citron yellow flowers. Lovely against the glaucus, cumbeline-like leaves. 4-5 ft. June-July. .40 1.00 3.00
    orientalis. An Ivory white variety. The same height and season as T. Atropurpureum and beautiful with it. 3-4 ft. May and June. .50 1.20 3.50
    polygamum. "Wild native Meadow Rue.” A magnificent plant. 6-7 ft. high, in rich, moist soil. The great foamy panicles of cream colored flowers are very beautiful in August. .40 1.00 3.00

THERMOPSIS. Ordinary soil in sun.
    Carolinianum. One of our handsomest native plants. Spikes of lemon yellow flowers, like great lupins on 5-6 ft. stems. End of June. .40 1.00 3.00

THYMUS. Ordinary soil; sun or semi-shade.
    *Serpyllum citriodorus. “Lemon scented thyme.” Forms mats of fragrant foliage with myriads of small reddish pink flowers. 9-12 in. Every rock garden should have this. .30 .75 2.00
    *—coecineum. “Crimson thyme.” A pretty low creeper with crimson flowers and bronzy foliage. 4 in. Fine carpeter. .30 .75 2.00
    *—lanuginosus. “Woolly thyme.” Downy, gray foliage almost like gray moss. One of the finest carpeters or for planting between stepping stones. .30 .75 2.00
    vulgaris. The old fashioned herb. Aromatic foliage; fine for flavoring. .30 .75 2.00

TIARELLA. Leaf mold soil; semi-shade.
    cordifolia. “Foam Flower.” A beautiful ground cover under trees or in the woods. In early spring it is covered with little spires of white bloom. 8-10 inches. .30 .75 2.00
TRADESCANTIA. Ordinary soil; sun or semi-shade.

**virginica.** Three petaled, rich, purple flowers that naturalize easily and make a spot of strong and brilliant color in the wild garden. 1-2 ft. June-July. ..................................................  .30 .75 2.00

—*alba.* A lovely, white variety of the above ..................................................  .35 .85 2.50

—"Bartram." Originally from Bartram's Gardens. Tall, upright growing with lavender flowers that remain open all day. 2-3 ft. July-August. The finest Tradescantia ..................................................  .50 1.20 3.50

**coccinea.** A deep red purple variety of T. Virginica. 1-2 ft. July-August. ..................................................  .35 .85 2.50

TRITOMA. Rich soil in sun.

**Hybrids.** "Torch Lilies." Tall stalks, hung at their tops with recurved, pendant, tubular flowers shading from lemon yellow to flame orange. A very strong and brilliant note in the garden. The earliest begin to bloom in June and continue until October. 3-4 ft. ..................................................  .40 1.00 3.00

TUNICA. Ordinary soil in sun.

**Saxifraga.** Resembles a delicate pink Gypsophila. Fine, grass-like foliage forming large mats and above which float—like a pink mist—the graceful flowers. One of the best rock plants. 12 in. July. ..................................................  .35 .85 2.50

VALERIANA. Ordinary soil in sun.

**officinalis.** "Garden Heliotrope." A fine border plant with clusters of delightfully fragrant, cream colored flowers on 3-4 ft. stems. July-Aug. ..................................................  .35 .85 2.50

—*alba.* Panicles of soft white flowers; glossy green leaves. Splendid for cutting. A continuous bloomer. 2-3 ft. July-Sept. ..................................................  .35 .85 2.50

—**coccinea.** A beautiful rose-coral form of the foregoing. A striking color which will be appreciated and command attention. 2-3 ft. July-Sept. ..................................................  .35 .85 2.50

—rubra. See Centranthus ruber.

VERBENA. Ordinary soil in sun.

**Canadensis.** A robust, hardy variety, with many branched stems at the tips of which appear the pale lavender flowers. 12-18 in. July-Aug. ..................................................  .50 1.20 3.50

**erinoides.** A splendid plant making a beautiful showing in late summer and early autumn. Fine dark foliage and masses of brilliant purple flowers. 12 in. ..................................................  .50 1.20 3.50

VERONICA. Rich soil in sun.

**allioni.** One of the most charming rock plants with intense sapphire blue flowers studding the plant. 4 in. Early May. .......  .40 1.00 3.00

**spicata rosea.** A handsome "Speedwell" with spikes of soft rose flowers on 12 inch stems. One of the best border varieties. June-July. ..................................................  .40 1.00 3.00

**subsessilis (syn. longifolia).** A border without this beauty would be incomplete. The spikes are studded with amethyst-blue flowers in July-Aug. A brilliant flower. Fine for cutting. 2 ft. ..................................................  .40 1.00 3.00
VERONICA—Continued

*tucrium rupestris. A spreading mat of fine foliage which in May and June is covered with brilliant indigo blue flowers. A gem for the rock garden. 6 in. .......................................................... .30 .75 2.00

— "Heavenly Blue." A delightful light blue form of the above. May, and often scattered blossoms in the fall. Dwarf and choice. 4 in. .......................................................... .35 .85 2.50

— rosea. The clear light pink flowered counterpart to the above. For a charming effect grow this in conjunction with the above "Heavenly Blue." Stunning .......................................................... .35 .85 2.50

VINCETOXICUM. Ordinary soil in sun.
Japonicum. (syn. Cyanthus acuminatifolium). "Mosquito plant." Said to trap mosquitoes with its sticky juice. Cream colored flowers followed by interesting pods. 1 ft. .......................................................... .30 .75 2.00

VINCA. Cool soil; shade or semi-shade.
*Alpina. A charming variety with wine red flowers in June-July. .40 1.00 3.00
*minor. A trailing, evergreen ground cover popularly known as "Periwinkle" or "Ground Myrtle." Deep green leaves and pretty violet-blue flowers in May. .25 .65 1.50
*— alba. The counterpart to the above with ivory white flowers. Lovely in combination with the above variety. .40 1.00 3.00

VIOLA. Leaf mold soil; semi-shade.
*alba. Pure white violet. Charming and lovely. .......................................................... .30 .75 2.00
*blanda. A delightful native violet with creamy-white flowers. Fine under trees. April-May. .......................................................... .30 .75 2.00
*cornuta alba. An extra large milk white violet which is both beautiful and showy. .......................................................... .30 .75 2.00
*papilionacea. The "Confederate Violet." Pale blue and white flowers in large spreading clumps. Lovely in moist ground in front of Ferns. June. 10 inches. .......................................................... .35 .85 2.50
*pedata bicolor. A most beautiful Violet. The two upper petals rich velvety purple, the lower ones a pale violet-blue. Flowers large and leaves very finely cut. Likes acid soil, sun and sand. June. .......................................................... .50 1.20 3.50
*pubescens. Wild yellow Violet. Fine for the Wild Garden. The blossoms are branching up the stalk. 10 inches. May. .......................................................... .20 .75 2.00
*tricolor. The old fashioned "Johnny-Jump-Up." Small pansy-like flowers that bloom profusely, even on mild days in December. A rampant spreader, but if kept in bounds, very lovely in the rock garden or growing in the chinks beside stone steps. 1 ft. Flowers, yellow, bronze, blue and mostly deep, velvety purple. .......................................................... .25 .65 1.50

WALLFLOWERS. The fragrant English Wall Flowers. Yellow, bronze and deep red. Rich, moist soil in sun or semi-shade. June. 1-2 ft. .......................................................... .35 .85 2.50

YUCCA. Ordinary soil in sun.
filamentosa. Clumps of bristling, evergreen foliage and tall spikes of creamy, bell-shaped flowers. Beautiful by themselves or planted at the foot of Cedars or combined with Orange Asclepias and Cactus. 4-6 ft. June. A fine and majestic plant. .40 1.00 3.00
HARDY SHRUBS & VINES

ABELIA. Rich soil, sheltered spot in sun.

grandiflora. “Hybrid Abelia.” The graceful, arching stems are clothed with dark, glossy, nearly persistent leaves; white flowers tinged with pink, about an inch long, borne in profuse clusters from early summer until checked by frost. Requires winter protection. Stock limited. Prices on application.$ .65 $1.50 $4.50

BAMBUSA. Moist soil in sun.
palmata. A rare species of Bamboo which is excellent for waterside planting. Dwarf growing—1½-2½ ft.—with broad bright green foliage. Stock limited.......................... 5.00
Veitchii. Another very choice Bamboo. Similar to the foregoing but somewhat taller in growth. 3½-4 ft. Very broad leaves. Fine for lily pools or edging ponds. Stock limited.......................... 5.00

Variabilis magnifica. This is really a shrub, but the top usually freezes back, and new growth starts from the root. Plants grow 3 to 4 feet and are covered with long racemes of lilac-like flowers all Summer............................... .65 1.50 4.50

CALLUNA (Heather). Peaty soil; semi-shade.
vulgaris. “Heather.” A low, bushy shrub, with tiny clustered leaves and slender, erect spikes of small pink flowers. Late summer. 8 to 10 in. (Also see Erica Page 36).......................... .65 1.50 4.50

CALYSTEGIA (syn Convolvulus). Ordinary soil; sun.
Pubescens. A delicate climber, bearing large double rose flowers from July to frost. Limited stock................................. .40

CARYOPTERIS (Blue Spirea). Rich soil; best in sheltered sunny spot.

Mastacanthus. A handsome hardy perennial; grows about 3 feet high and produces rich lavender-blue flowers in great profusion the whole length of the branches. A valuable plant, blooming continuously from early in September until cut by frost............ .65 1.50 4.50

CELASTRUS. Ordinary soil in sun.
scandens. “American Bittersweet.” A native climber, with glossy leaves which turn bright yellow in autumn, and clusters of orange and crimson fruit, which hang on the vine all winter or which may be cut and used for winter bouquets. One of the showiest and prettiest of vines.......................... .40 1.00 3.00

CHAMAE DAPHNE. Rich, cool soil; sun.

*calyculata. “Leather Leaf.” A very rare and delightful shrub with white flowers in April. The bronze green leaves persist throughout the winter. Useful for the rock garden. 3-4 ft. Prices on application.......................... 1.00 3.00

CLEMATIS. Moist but well drained soil; sunny sheltered spot.

heracleaeefolia Davidiana. “Fragrant Tube Clematis.” 3 ft. August and September. Bushy plants with whorls of hyacinth-like, sweetly scented, pale blue flowers. Leaves larger than any other variety................................................. .40 1.00 3.00

graveolens. A vigorous and splendid vine with a profusion of yellow flowers during July-Aug.......................... 1.00
CLEMATIS—Continued

Jackmanni. One of the most popular and easy to grow. A splendid vine with a multitude of rich deep purple flowers. 1.50

Jackmanni hybrida "Ramona." One of the most beautiful of the gorgeous hybrids raised by Mr. Jackman. An exceptionally fine, soft blue. Stock limited. 1.50

COTONEASTER (Rock Spray). Ordinary soil; sun.

*Horizontalis. A low shrub with almost horizontal branches. Native of China. Leaves dark green, about half an inch long; flowers pinkish white; fruit bright red; attractive in rockeries. A most desirable ground cover, and should be largely planted. 1.50 4.00

CYDONIA. Rich soil in sun.

Japonica. "Japan Quince." A very showy, popular shrub, which blooms profusely in early spring; flowers dazzling scarlet; yellow pear-shaped fruits. 65 1.50 4.50

CYTISUS

We take great pleasure in offering herewith, what we confidently believe to be the most complete selection of Cytisus (Brooms) ever offered in this country. All of these do best in a sheltered sunny location in well drained soil. Until well established they will be benefitted by winter protection. Stock limited.

capitatus. A tall shrub with deep green foliage and terminal clusters of pale yellow flowers. Summer. 1.00

carlieri. Compact bushes, 3 feet high. Erect spikes of yellow flowers. July-Sept. 1.00

Hybrida. "May Fly." A charming free flowering shrub reaching 4-5 feet in height. Scarlet and yellow flowers in early summer. 1.00

nigricans. Unquestionably one of the finest shrubs in cultivation with a profusion of soft yellow flowers in summer. 1.00

Ratisbonensis. One of the earliest flowering varieties. The long branches are wreathed with pretty yellow flowers in May. 1.00

scoparius. "Scotch Broom." A hardy shrub, with small leaflets in threes, and small yellow flowers in May. Valuable for sandy soil and seashore planting. Unique and very handsome. 65 1.50 4.50

DAPHNE. Peaty soil in semi-shade.

*Cneorum. "Garland Flower." A trailing evergreen plant, with narrow, glossy green leaves; flowers fragrant, bright pink, in round clusters at tips of branches, appearing in May and again in August. Very effective on banks and in shady places. Superb in the rock garden. 1.50

ERICA (Mediterranean Heather). Peaty soil; semi-shade.

carnea (herbacea). Grows about 6 inches high, leaves arranged in fours; nodding, bell-shaped flowers along the stem. At its best in a sheltered nook in the rock garden. March. 65 1.50 4.50
SHRUBS—Continued

EUONYMUS. Ordinary soil; sun or semi-shade.
Japonicus. A very useful and decorative green shrub, with thick, shining leaves; thrives well near the seashore. The foliage is very effective in winter. 5-6 ft. ........................................... .50
radicans minimus (Kewensis). A rare little trailing plant with very small, round leaves, light green with whitish veins. Always remains close to the ground........................................... .65 1.50 4.50
radicans. “Wintercreeper” or “Evergreen Bittersweet.” Rich green foliage and clusters of orange berries. Hardy where English Ivy is not.......................................................... .65 1.50 4.50

FORSYTHIA. Ordinary soil in sun.
suspensa Fortunei. “Golden Bell.” The branches of this shrub are covered with a profusion of rich yellow flowers; deep green foliage, turning purplish in autumn. 3 to 4 ft. April........................................... .65 1.50 4.50

GENISTA. Well drained soil in sun.
*Germanica. A useful and very pretty shrub with arching sprays of yellow flowers in mid-summer. Stock limited........................................... 1.00

GORDONIA. Rich soil in sun.
Pubescens. An extremely rare and most delightful shrub with immaculate white cup shaped flowers 2-3 inches across. Deep orange stamens and a wonderful fragrance add to the beauty. The attractive foliage turns to glowing bronzes and crimsons while still in flower. Our choicest and rarest offering. Sept.-Oct. Prices on application.

HEDERA. Moist soil in shade.
helix. “English Ivy.” This is the popular, small-leaved variety, and has proved perfectly hardy. Is now very extensively used in this country for covering brick and stone walls and dwellings.............................................................. .35 .85 2.50

HYPERICUM. Ordinary soil in sun.
*aureum. A dwarf variety. Numerous bright yellow blossoms in July and August. Fine subject for Alpine garden; 12 to 18 inches. ............................................................. .40 1.00 3.00
*Lichiang Range. One of the immortal Farrer’s introductions from China. Of compact bushy habit with yellow flowers. Rare. Stock limited................................................................. 1.00
Moserianum. “Gold Flower.” Beautiful golden yellow flowers, with crimson stamens. Dwarf habit. Very showy and attractive. Strictly speaking this is a perennial plant although so shrub-like we are listing it as a shrub. Stock limited.......................... .50

ILEX (Holly). Rich cool soil; sun.
opaca. “American Holly.” A slow-growing tree, having short, spreading branches, with large, shining, thorny leaves; bright red berries in winter. Perfectly hardy. 2 to 2½ ft........................................... 5.00
2½ to 3 ft.............................................................. 6.00
